*****UPDATED MANUFACTURER CONTACT INFORMATION BELOW*****

Dear HIRSP Policyholder:

As a part of our commitment to improve the health of you and your family, Navitus would like to alert you that **Actavis Totowa LLC has issued a recall of all Digitek® (digoxin) tablets for oral use.**

Digitek is a drug used to treat heart failure and abnormal heart rhythms. This voluntary recall is due to the possibility that tablets with double the appropriate thickness may have been released. These tablets may contain twice the approved level of Digitek's active ingredient. Double strength tablets of Digitek pose a risk of digitalis toxicity in patients with renal failure. Digitalis toxicity can cause nausea, vomiting, dizziness, low blood pressure, cardiac instability and bradycardia. Death can also result from excessive intake. Several reports of illnesses and injuries have been received.

If this recall affects you, it is important to contact your prescriber immediately to find a suitable alternative.

For questions about this change, please contact Stericycle customer service at 1-888-276-6166 with representatives available Monday through Friday, 8 am to 5 pm EST. Additional information about the voluntary recall can also be found at www.actavis.us. You may also contact your healthcare provider or call the HIRSP Pharmacy Dedicated Unit toll-free at 1-866-270-3877.

Sincerely,

Thomas Radloff, Registered Pharmacist
Director, Clinical Pharmacy Operations
